

# WELCOME ADDRESS

“Technical Solutions in the Oil Field: Fueling Innovation and Operational Excellence”

## ABOUT THE SPEAKER

Jody Elliott is President of Oxy Oil & Gas – Domestic, a subsidiary of Occidental Petroleum Corporation, an international oil and gas exploration and production company, and one of the largest oil and gas companies in the U.S., based on equity market capitalization.

Appointed in 2015, Mr. Elliott leads the management of Occidental's U.S. oil and gas business with responsibility for the company's Permian Basin EOR and Resources assets. He also has oversight for Data Management and Analytics, Regulatory and Land functions for the company's domestic operations.

Welcome Address *delivered by*

## JODY ELLIOTT

President, Oxy Oil & Gas

**8-8:35 a.m. Tuesday, Dec. 12, 2017**

**General Assembly Theatre C, George R. Brown Level 3**

Admission is open to the public

Innovation has always played a critical role in the oil field, both in conventional and unconventional drilling. With low commodity prices, technical solutions have taken on even more importance, as companies look for new ways to drill and produce more efficiently and effectively. Advances in electrical submersible pumps, gas lift, water injection and carbon dioxide recovery and compression, to name a few, are fueling operational excellence across the industry. The result: reduced development cost, OPEX, and increased production.
